SUMMARY

Detail-oriented Data Analyst with 2 years of experience in interpreting and analyzing data to drive successful business solutions. Proficient in data manipulation, visualization and reporting usings tools such as SQL, Python, Excel, and Tableau. Skilled in identifying trends, uncovering insight, and optimizing processes to improve decision-making and efficiency. Adept at collaborating with cross-functional teams to solve complex business problems. Seeking to leverage my analytical expertise to support data-drive strategies and contribute to organization growth.

TOOLS

- Data Collection and Extraction – SQL, Python, R, Excel, Google Sheet
- Data Cleaning – Python
- Data Visualization – Power Bi, Excel, Tableau, Python Viz (Matplotlib, Seaborn, Plotly)
- Statistical Analysis – R, SPSS
- Big Data – Google BigQuery
- Communication Tools – Teams, Google Meet, Zoom, Discord
- Repository – Git (Gitlab & GitHub)
- Others – PowerPoint, Microsoft Word

PROFESSIONAL EXPERIENCE

Data Analyst Intern (March 2024 – August 2024) Fanrave

- Collected and cleaned data from various (databases, APIs, etc.)
- Perform data cleaning and preprocessing using tools such as Python, R or SQL ensuring accuracy and consistency for analysis
- Analyze data to uncover trends, patterns and insight to drive business decisions
- Develop dashboards and reports using tools like Power BI, Tableau or Excel
- Collaborate with cross-functional teams to gather business requirements and deliver actionable insights
- Conduct statistical analysis to measure business performance

Junior Data Analyst (August 2024 – Till Date) Fanrave

- Designed SQL queries to manage and retrieve data, improving data accessibility by 40%
- Analyzed sales reports to find trends and opportunities to increase the customer base
- Utilized techniques and business intelligence (Power Bi) to create dashboards and reports to address business problems and streamline processes
- Maintained reports with 90% on-time delivery
- Developed and maintained data models using Ms Excel and Power Bi to analyze sales data and create insightful visuals
- Developed and implemented processes to ensure data accuracy
- Collaborated with stakeholders to develop data-driven strategies

TECHNICAL SKILLS
- Pivot Table, VLOOK UP, INDEX-MATCH, Conditional Formatting and Visualization (Excel)
- Writing Query to extract, manipulate and analyze data; knowledge of joins, subqueries and widow functions (SQL)
- Data cleaning, analyses and visualization using libraries likes pandas, NumPy, matplotlib, seaborn and ggplot2 (python, R)
- Relational database
- Descriptive and Inferential Statistics

SOFT SKILLS
- Strong team, leadership and organization qualities
- Great capacity to learn fast, multitask and handle pressure sensibly
- Empathy with focus on being tactful, patient, persuasive and Coachable
- Good and effective Communication Skills
- Creativity and Critical Thinking, I have Problem solving Attitude

EDUCATION
(2023) University of Lagos, BSc (Ed.) Chemistry

INSTEREST
- Career Development
- Interested in new technologies
- Meeting and Influencing people positively
- Reading and researching
